

245W DC CHARGING KIT

Solar Array

The 245W Charging Kit includes 1 Kyocera 245W PV module. This includes a 20 year warranty from a manufacturer that has been supplying modules for longer than the 20 year PV warranty

KD 240GX	
Weight	46.3 lbs
Dimensions:	65.4" x 39.0" x 1.8"
Power (rated):	245W
Peak Current	8.23A
Voltage:	MPPT Only

PV Charge Controller

The 245W Charging Kit includes a Morningstar SS MPPT 15 charge controller. This is a MPPT controller, which includes a display remote. A MPPT controller is required for this wattage of PV module, which will effectively take the energy produced by the PV module and "mate" it to the battery bank.

PV Mounting Hardware

The 245W Charging Kit includes Z-Brackets with hardware and water tight expansion plugs. This mounting hardware allows for the PV module to be mounted flush on the roof.

Cable / Installation Guide

The 245W Charging Kit includes the required cable to install the kit.

SFRV245	WORK ORDER / BILL OF MATERIALS	
SOLAR ARRAY	12V	
KKD245GXLPB	Kyocera P Series 245W Module: - Requires MPPT Charge Control, 60 Cell,	1
